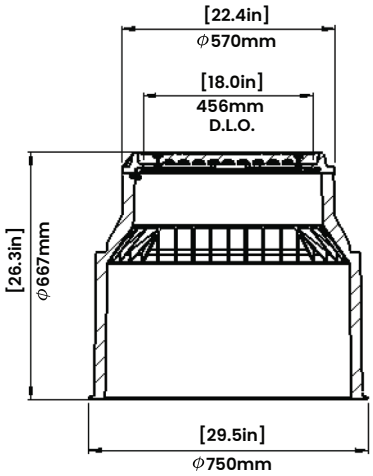
Cyclone Round 23X26 Tier 22 HDPE Vault



Cyclone Round 23" Diameter 26.4 in Depth HDPE T22 Vault BABA

Description

The CYG-FEV-2326-T22-US is a specialized Access Chamber, Vault, or Boundary Box designed to support your fiber needs. Engineered in a single-shot molding process for superior strength and longevity, it features a tapered chamber structure that optimizes cable slack storage. Manufactured from lightweight, high strength composite materials, the CYG-FEV-2326-T22-US delivers reliable, efficient, and secure network integration.

Features and Benefits

- Light weight and durable, ideal for FTTx deployments.
- The CYG-FEV-2326 are comparable in volume to 17x30x24 Vaults.
- Flexible Installation: The unit can be retrofitted around existing infrastructure using the optional knockout conduit ports.
- Optimized Design: Smaller lid diameter and tapered body minimize footprint at ground level while maximizing volume inside the chamber for cable and closure housing
- Efficient Transport: Stackable design allows for high packing density, reducing transport costs.
- Secure Lid: Hingeless slide-in lid with bolt down locking technology ensures added security.
- Quality Manufacturing: Manufactured in an ISO 9001 certified facility and tested in accordance with relevant national and internation standards, ensuring quality and reliability
- Circular design simplifies installation: Eliminates alignment issues seen with rectangular vaults, especially near curbs and sidewalks.

Specification	
Dimension	Ø580mmx670mm (23” x 26.4”)
Weights	78.5 LBS (35.6Kg)
Load Class	EN124: B125 (12.5T), ANSI: Tier 22 (15.3T)
Branding	As per customer requirement

*Load ratings are nominal values based on standardized test conditions. Actual performance may vary depending on installation practices and site conditions.
